

NORSTAR
STEEL RECYCLERS

Domestic Services

Norstar Steel Recyclers has been recycling metals with the community since 1947.

Domestically we can all help save the environment for a better future. Did you know that by recycling metals versus mining virgin materials we can save up to 75% on energy; save up to 86% of air pollution; reduce water consumption by as much as 40%; and as much as 76% of water pollution compared to mining.

Recycling is a true example of a 'sustainable' industry – a concept fundamental to our society's drive to reduce its environmental impact on the planet.

***Help us help the environment;
Recycle your metals with Norstar today.***

We can assist with a service that can help you – recycle every type of 'home style' scrap metal, including fridges, washing machines, dryers, old stoves, hot water services, old baths, roofing iron, household electrical cables and even the old plumbing.

Our services cater for all types of domestic recycling, whether it be providing a bin service for your clean up or supplying specialised cartage equipment, we've got it covered.
